

THE JUKEBOX YOU CAN'T SEE, BUT CAN'T IGNORE.

**INTRODUCING THE PHANTOM BY AMI: a groundbreaking jukebox that eliminates cashbox collections, reduces hardware maintenance, and significantly shortens installation time—all at just a fraction of the cost of conventional models.**

Simply connect the Phantom to one or more TVs and let the screens do the rest. Like AMI's traditional jukeboxes, the TVs will display what music is currently playing and provide patrons with easy-to-follow instructions on how to pay for and select music using our enhanced AMI Play mobile app. Plus, the Phantom offers even more by showcasing music videos, interactive trivia, and digital ads on the connected TVs.

No matter the venue, the Phantom is the ultimate entertainment solution, seamlessly combining cutting-edge technology with AMI's trusted integration to deliver an elevated experience for patrons and businesses alike.

Give your venues access to millions of songs. AMI's filtering tools let you tailor the music selection at your venues, aligning perfectly with their desired ambiance and vibe.

Run trivia games on the TVs connected to the Phantom. Trivia games run every 20 minutes, spanning 20 diverse categories. Patrons answer questions using the AMI Play app at no cost to them.

Enjoy access to over 35,000 selectable music videos that play on TVs connected to the Phantom. The AMI Play app lets patrons know when a video is available for the song they want to hear.

Use AMI Ad Manager to craft, plan, and manage your unique advertisements for display on TVs connected to the Phantom.
